LEARNING CENTER MANAGEMENT PLATFORM

LMS for your learning center

One system for students, teachers and administrators: timetable, attendance, marks, fees, library and online courses.

Student mobile app | Admin panel | Teacher panel

OVERVIEW

Everything in one place, for everyone

Students

A mobile app with their next class, schedule, marks, attendance, quizzes, chat, payments and online courses.

Teachers

A web panel for today's lessons, attendance, marks, lesson materials and their own online courses.

Administrators

Full control of students, groups, timetable, fees, announcements, staff and roles. Parents are kept informed too.

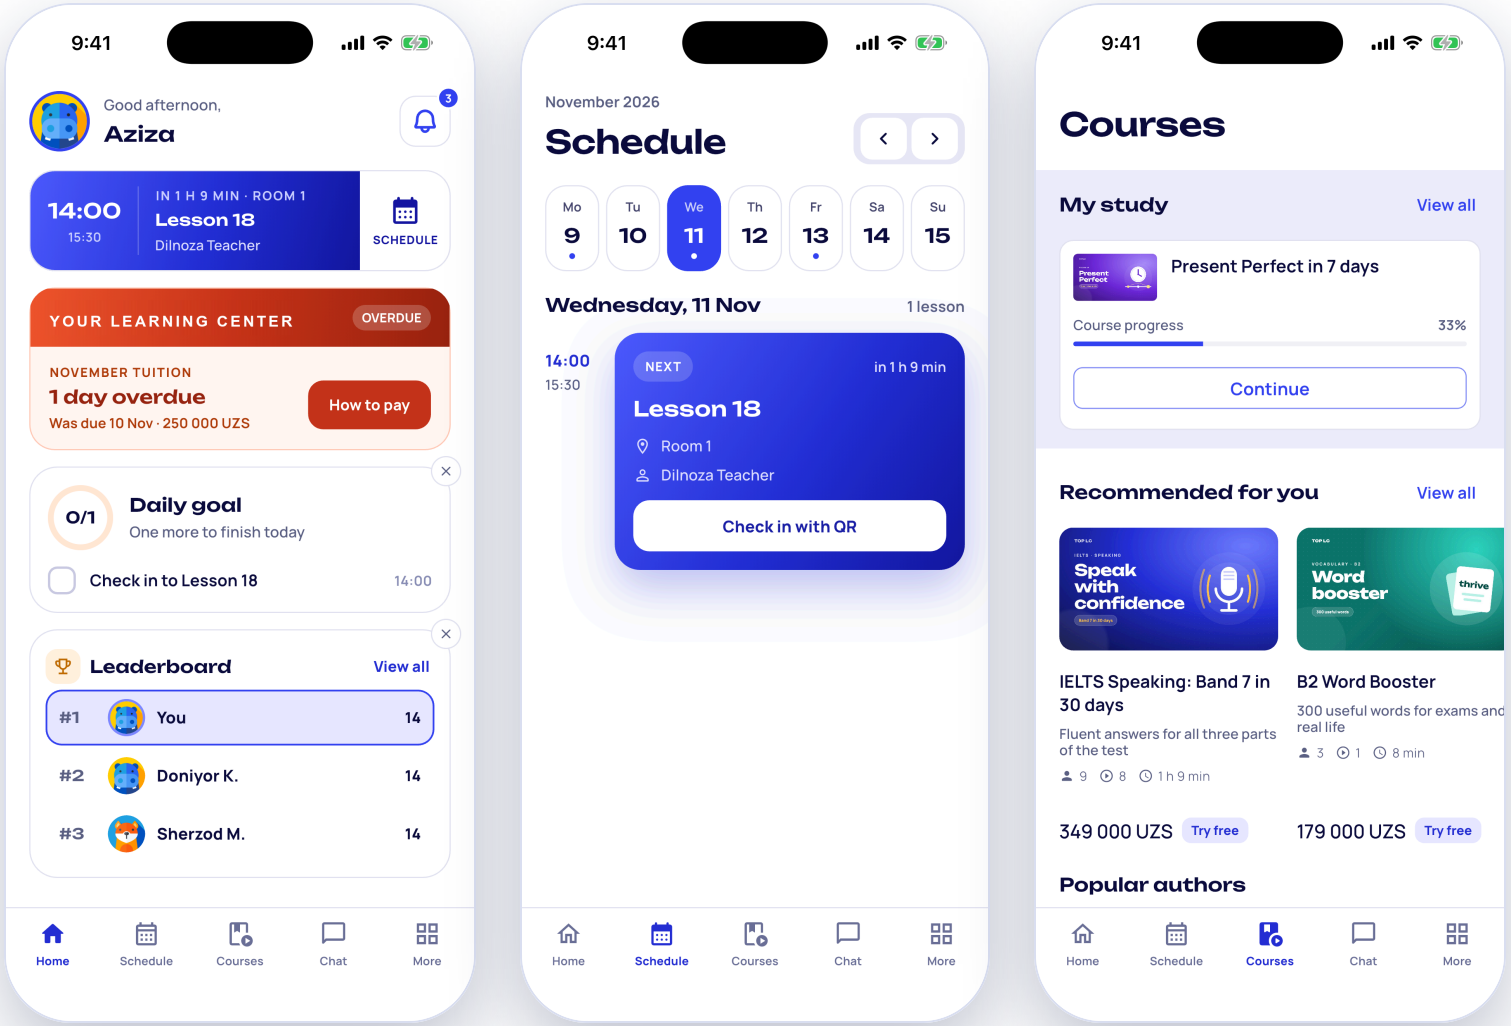

3
connected apps, one database

iOS + Android
one student app for both

Multi-branch
with role-based access

STUDENT APP

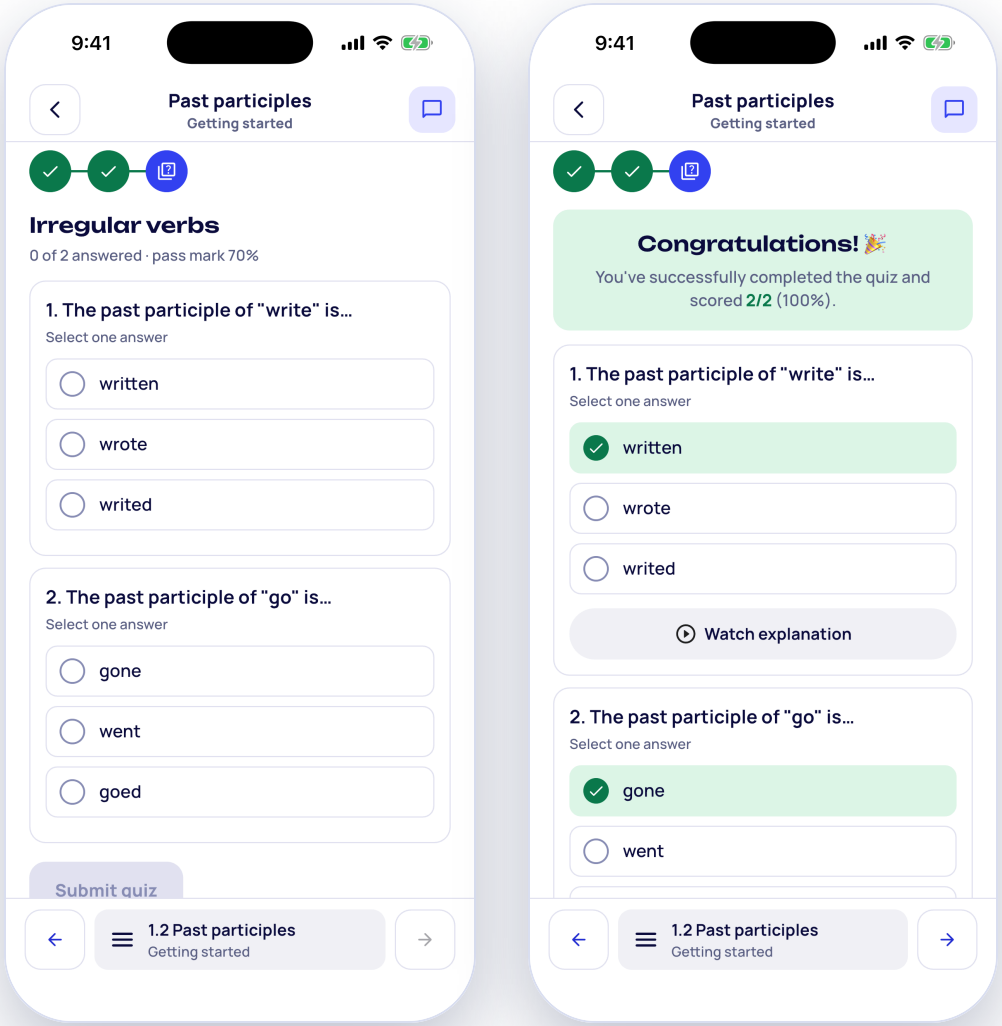

Learning in the student's pocket

- **Home:** next class, payment status, daily goal
- **Schedule:** the week, with QR check-in
- **Marks and attendance** per module
- **Leaderboard** to keep students motivated
- **Courses, library, chat** and push notifications

QUIZZES

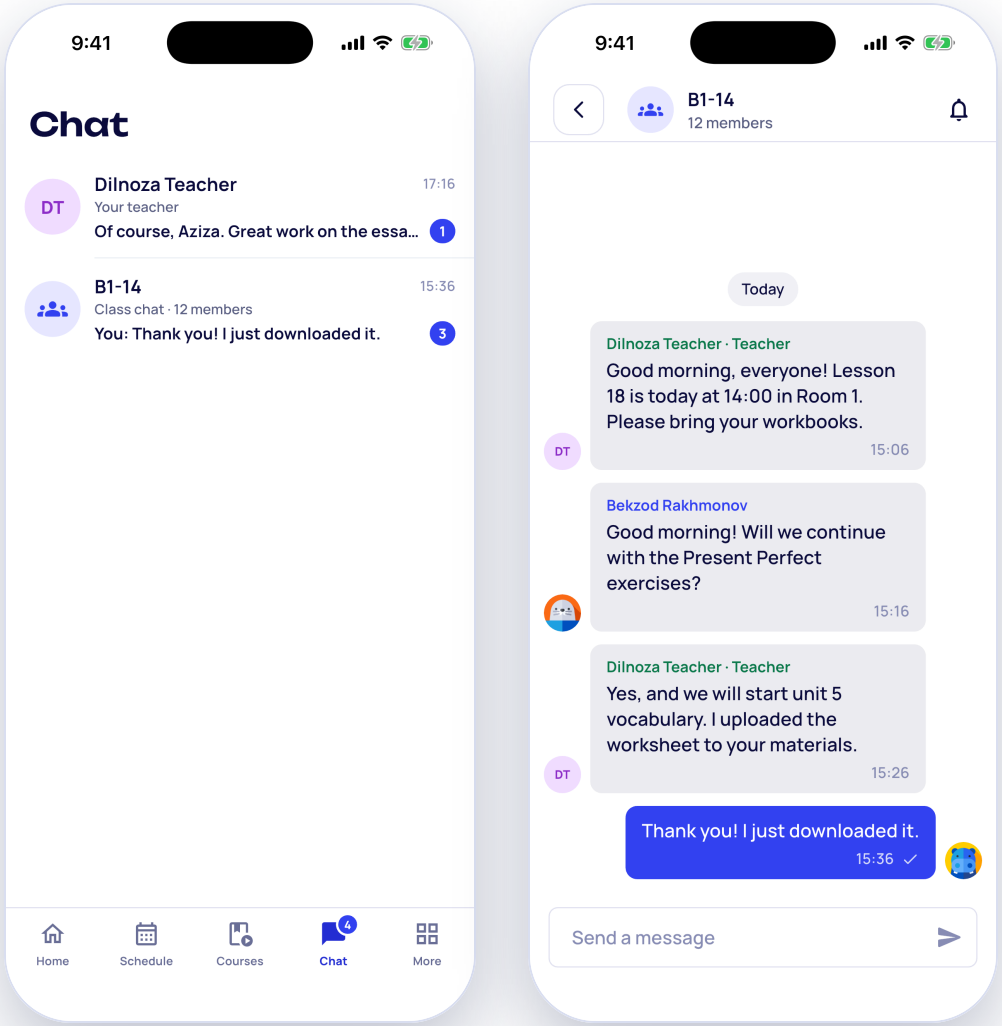

Practice that checks itself

- **Quizzes inside lessons**, next to text and video
- **One or several correct answers** per question
- **Graded on the server** with a pass mark you set
- **Instant result** with a short video explanation for each answer
- **Progress saved** so students can continue any time

CHAT

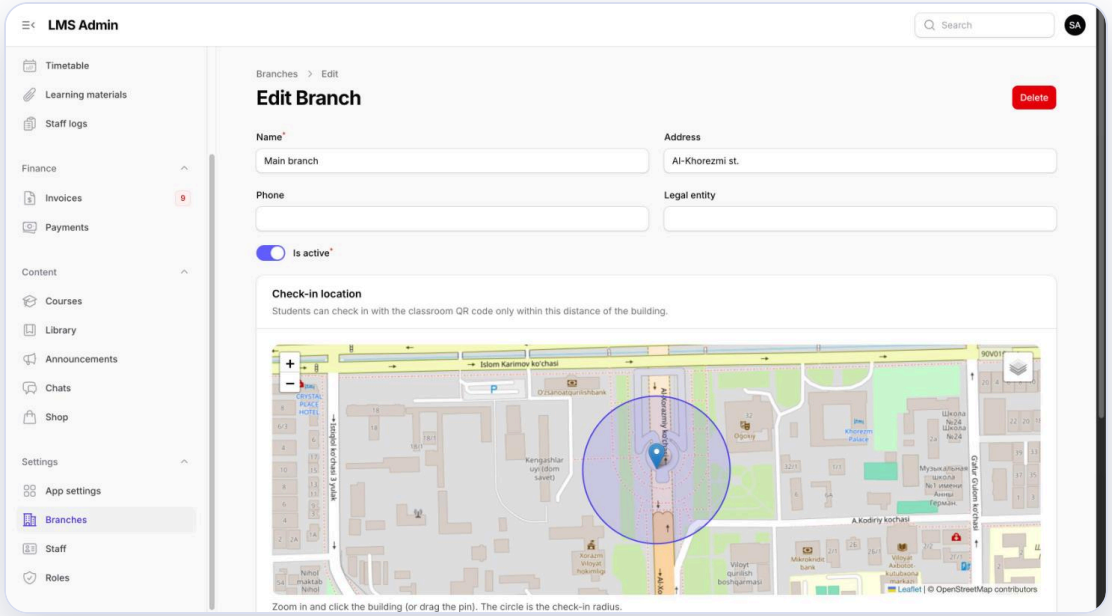

Students and teachers, always in touch

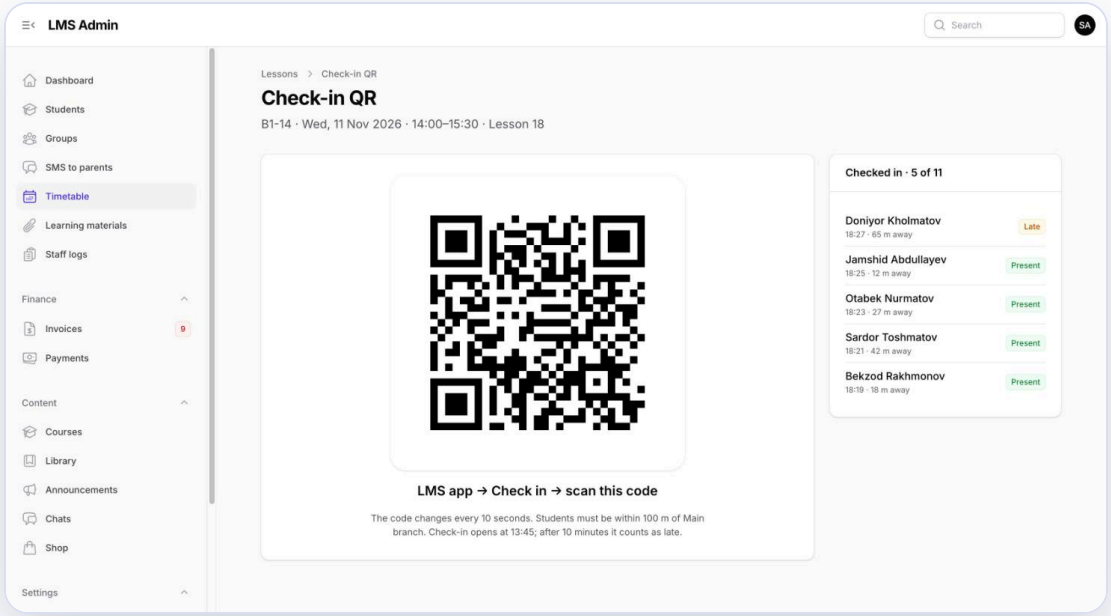

- **Class chats** for every group
- **Private chat** between a student and their teacher or course author
- **Custom chats** that administrators create for any people
- **Live messages** with push notifications and unread counters

QR CHECK-IN WITH LOCATION RADIUS

Attendance verified by place and time

Set each branch on the map and choose the check-in radius

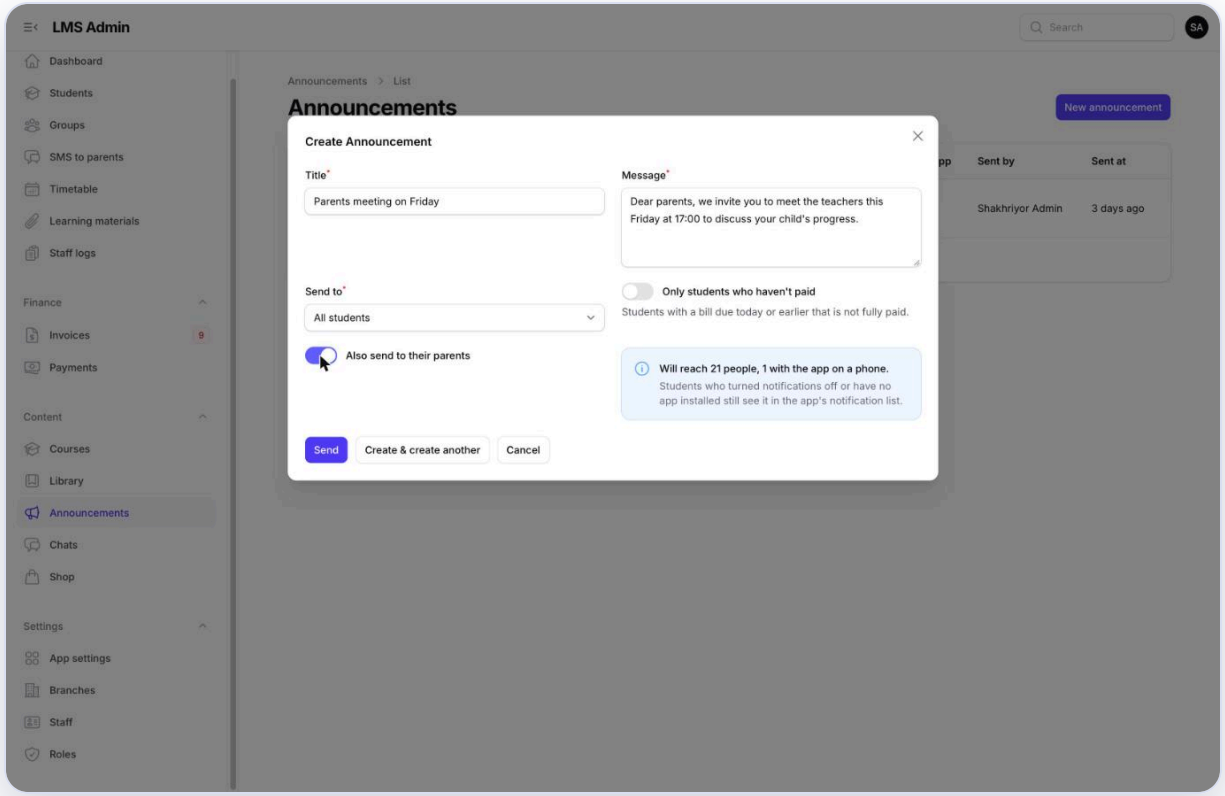

Classroom screen: rotating QR code and live check-in list

- **Inside the radius only:** the student's phone location must be within the branch circle
- **QR changes every 10 seconds,** so a photo of it is useless
- **Automatic attendance:** present, or late after a set number of minutes, with the distance saved
- **Only the right students:** enrolled in the group, from 15 minutes before the class starts

PARENT ACCESS

Parents stay in the loop

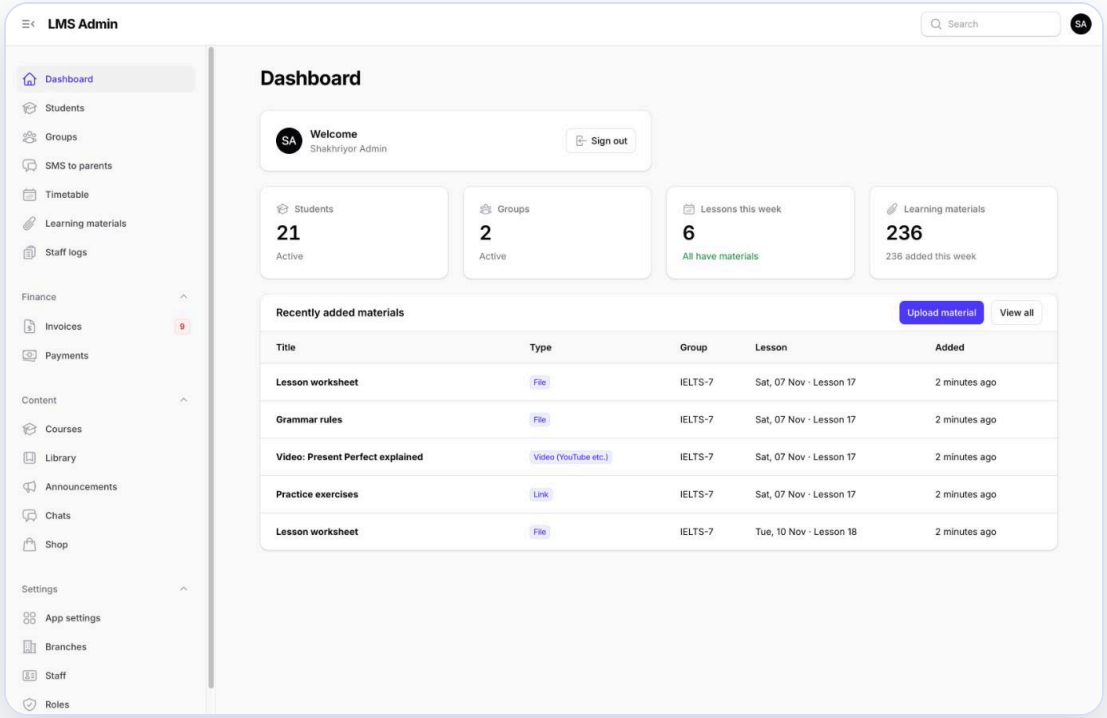

One switch sends an announcement to students and their parents

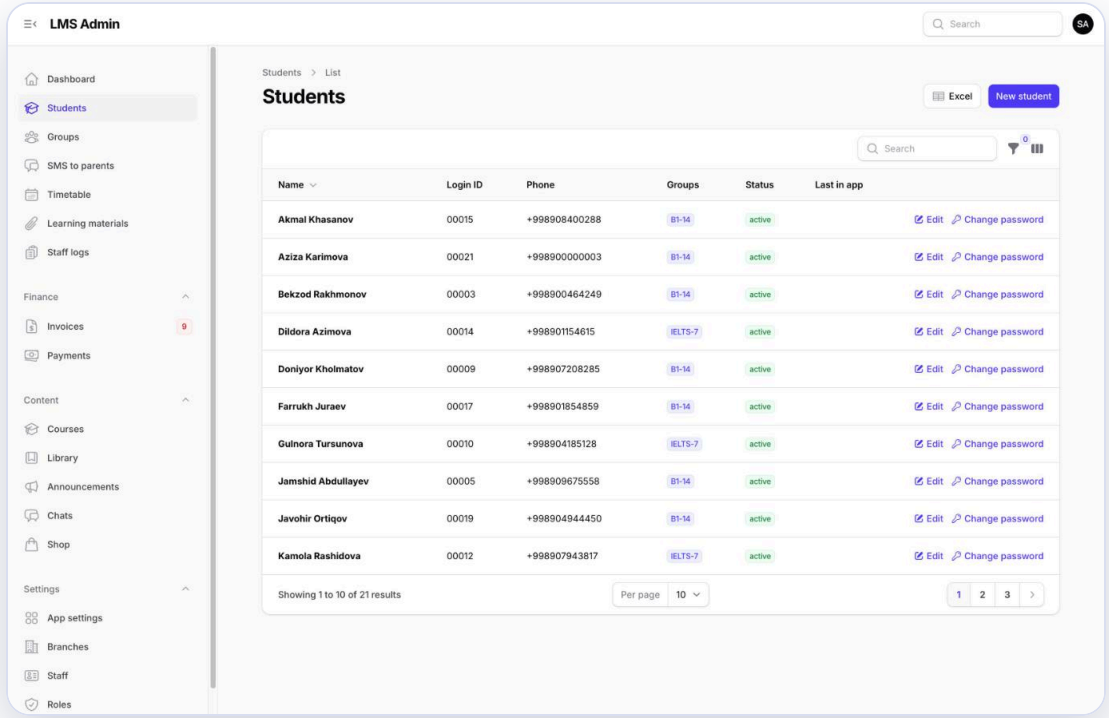

- **Own parent login** in the mobile app
- **Announcements reach parents** too, to a whole center, branch, group, or only those with unpaid bills
- **SMS with the child's result:** mark and place in the group, in Uzbek, Russian or English
- **Parent's phone** kept in each student profile

ADMIN PANEL

Run the whole center from one screen

Dashboard: students, groups, lessons, materials

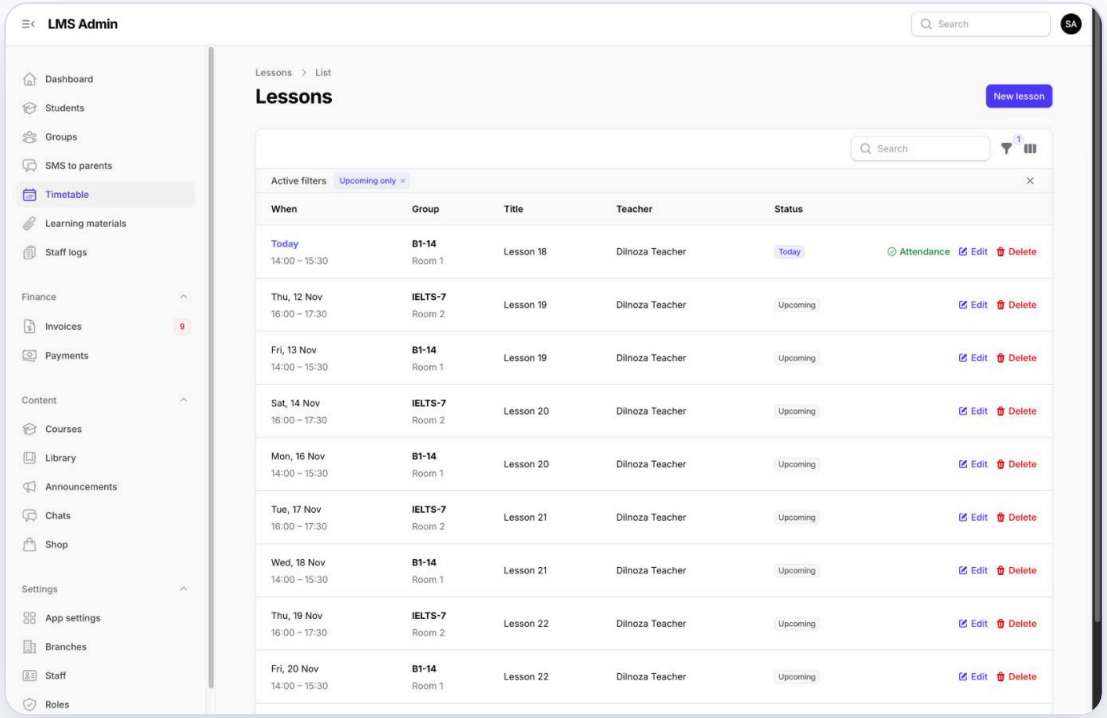

Students: search, groups, status, app usage

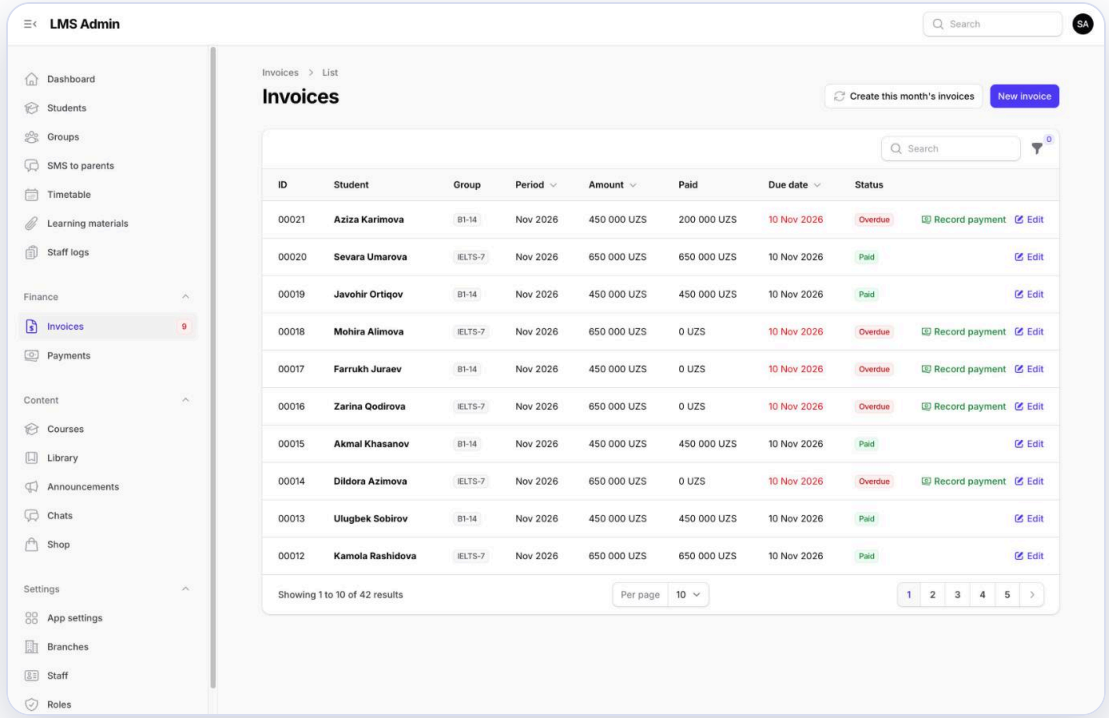

Students, groups, branches, staff and custom roles, plus Excel export and a log of staff activity.

TIMETABLE AND FINANCE

Lessons and fees that manage themselves

Timetable generated from each group's weekly pattern

Monthly invoices, payments and overdue tracking

Teachers mark attendance for each lesson in one click. Invoices are created every month and reminders go out automatically.

TEACHERS, CONTENT AND COURSES

Teaching tools and a new income stream

Teacher panel

- Today's lessons at a glance
- Attendance: present, late, absent, excused
- Weighted marks grid per group
- Upload materials; chat with students

Online courses

- Teachers build chapters, lessons, video and quizzes
- Admins review and publish
- Free or paid; quizzes graded automatically
- Progress tracking for every student

Library

Books and study materials, searchable by category, available to download in the app.

Announcements

Send to everyone, a branch, a course, a group, or only to students who have not paid, and to their parents too.

RELIABLE AND PRIVATE

Built to run your center every day

Automatic
invoices, reminders, lessons

Push
moved classes, marks, announcements

Private
files shared by expiring signed links

Let's set up a demo for your learning center.
